The Macomb County Department of Human Services is a state agency responsible for administering programs that provide financial assistance, medical assistance and social services to low income adults and children. The Federal and/or State funded programs include aid to dependent children, general assistance, food stamps, medicaid, delinquency, foster care, adoption, licensing, adult social services, family social services, protective services and employment and training services.

Macomb County provides assistance and administrative funds to the Department of Human Services. The major County funded program is resident county hospitalization. This program is intended to provide necessary hospital care to medically indigent persons whose hospital expenses cannot be covered by medicare, medicaid, or other government or prepaid health program funds. The county funded social service functions are divided into four basic areas: resident county hospitalization, county emergency assistance, county administration and county foster care. The foster care program provides payment for temporary foster care placement in situations where there is no need for court involvement. The county emergency assistance program provides emergency assistance for needy county residents when no state, federal or other local program can meet the emergency need.
