

Welcome back teachers!

It's sign up time for
Environmental Presentations offered
by the Macomb County Public Works Office.

Water and the Urban Environment **for 7th - 12th grades and community groups**

Water and the Urban Environment is designed for an older audience that can understand more complex issues involving water resources. It starts with a Power Point presentation about local waters and sources of water pollution.

Environmental concepts are brought to life using a model of a typical neighborhood. We discuss current pollution problems and how each of us can help protect our environment.

"It was fun learning from your model. It showed me what really happens to our lakes and rivers when we pollute!" 10th grade student
Clintondale High School

"This presentation gives my students up to date information on local water issues that can't always be found in a text book!"
Dakota High School Science Teacher

- An award winning environmental education program sponsored by Macomb County Public Works Commissioner Anthony V. Marrocco
- Free to all schools and community groups in Macomb County, in your classroom or meeting place

To schedule a presentation, click on this link and complete your request:
