

Master Composter Class 2011

Why learn to compost?

Backyard composting will:

- reduce the solid waste stream
- improve your garden and flower beds at little or no cost
- provide a rich humus without producing odors or attracting critters
- comply with Michigan legislation that prohibits landfilling or incinerating yard waste

The Master Composter program has two objectives:

1. to provide individuals with current, correct knowledge and information on composting and
2. to promote the sharing of this knowledge with others in the community through a variety of volunteer activities.

The **MSU Extension Master Composter** classes are team taught by regional Extension agents, Michigan State University specialists and other local experts.

MASTER COMPOSTER CLASS 2011

Date: Thursdays - October 6 – November 10, 2011
